

# Health Care for Your Teen

As your child grows, CHN can help them with their healthcare needs.

## Private Care

The care that your teen gets at CHN will start to change. **The doctor will ask you to leave the room for part of your teen's visit.** Your teen and their doctor will talk about health and other concerns. What your teen and their doctor talk about in this time is kept private.

## Visits on Their Own

- **You can sign a consent form that lets your teen go to the doctor alone.** They can get check ups, care for small health problems, and shots. We will tell you about the care they get from these visits.
- Some visits are kept private. In New York State, **teens can get sexual and reproductive health care and mental health care without consent from parents.** This means that we can't tell you about these visits unless your child agrees to it.

**Talk to your CHN doctor to learn more about your teen's care.**
