Hepatitis C

Hepatitis C is an infection that can harm your liver. This sheet tells you more about Hepatitis C.

How do I know I have Hepatitis C?
Most people don’t notice any signs or feel sick from Hepatitis C for a long time. But you can get a blood test to see if you have Hepatitis C. Get tested if you:

- were born between 1945-1965.
- got a blood transfusion or organ transplant before 1992.
- were treated for blood clotting problems before 1987.

People who do have signs of Hepatitis C may notice:

- fever
- feeling very tired
- not feeling hungry
- feeling like you’re going to throw up or throwing up
- stomachaches
- dark pee
- gray poop
- joint pain
- jaundice (yellowish skin or eyes)

Even if you don’t feel sick, Hepatitis C can still harm your liver. If you have Hepatitis C, get treated to keep your liver healthy.

Care you can feel good about. 866.246.8259 www.chnnyc.org
Is there treatment for Hepatitis C?
- There are different medicines that can treat Hepatitis C.
- A medicine called Harvoni can cure Hepatitis C. When you take Harvoni, you take 1 pill a day for 2-6 months. But Harvoni can cost a lot of money. Talk to your CHN doctor to learn more about Harvoni and other medicines.

What else can I do to stay healthy if I have Hepatitis C?
- Eat healthy food. This makes it easier for your liver to stay healthy and fight infection. Talk to your CHN nutritionist about healthy eating.
- Talk to your doctor before you take any medicines or herbs. Some medicines and herbs can hurt your liver if you have Hepatitis C.
- Don’t drink alcohol. Alcohol can also hurt your liver. It can also make it harder for your Hepatitis C treatment to work.
- Get lots of sleep to keep your body strong. This makes it easier for your body to fight infection.

Can I spread Hepatitis C to other people?
People can get Hepatitis C through sex without a condom or sharing needles. To avoid spreading Hepatitis C to others:
- Use condoms the right way every time you have sex.
- Don’t share needles.
- Don’t share personal items like toothbrushes, nail clippers, or razors.

Talk to your CHN doctor to learn more about Hepatitis C.
